ADACI's CPO community is excited to share an extraordinary opportunity:

the Italian CPO has established an agreement with IFPSM (International Federation of Purchasing and Supply Management) for the European and International Chief Procurement Officer format, a pioneering initiative that makes us part of a vision that extends beyond national borders. This new program is designed to connect procurement strategies and tactics at a global level, recognizing how international dynamics profoundly influence our daily operations. Within the framework of our cross-border amplification initiatives, we present the key outcomes from the International Chief Product Officer Club's hybrid convening:

- Boost Procurement Engagement
- Expanding Procurement Responsibilities
- Increasing Intelligence Sources
- Exploring Automation and AI in Procurement

- Collaborating with IT for AI
- International Corporate Guests
- Program
- Submission

With:

Fabrizio Santini - National President of ADACI

Giovanni Atti - Board Member IFPSM

Paolo Marnoni - ADACI IFPSM

Federica Dallanoce - Vice President ADACI

Mariusz Geraltowski - Board Member IFPSM
